

NEW RANGE ECULMB UNITS

FOR 2-STROKE EFI HUSQVARNA AND KTM

ECULMB 2 STROKE EFI RACE KIT

ECUS FOR 2-STROKE FUEL INJECTED ENGINES + INJECTORS SUPPORT KIT

- GPA**
- LC GPA**
- Wi Fi**
- MAP1 MAP2**

INCLUDED IN THE KIT

ECULMB Race Kit includes the innovative ECULMB unit, developed for **KTM EXC 300/250 TPI** and **Husqvarna TE 250i/300i**, and an aluminium injectors support. With GET Race Kit the injectors will be moved between cylinder and throttle body, allowing a huge power increase, especially at low/medium RPM, and a totally smoother rideability. The ECU included in the Race Kit comes with 2 different maps: Map 1 is in racing configuration with no GPA "traction control", Map 2 is in racing configuration with GPA "traction control" set at level 5. **Map Switch** and **WiFi-COM** are included in the pack.

KEY BENEFITS

REPROGRAMMABLE WITH SOFTWARE MAYA

TRACTION CONTROL GPA

2 PREINSTALLED RACING MAPS

WiFi-COM INCLUDED

OPTIMIZATION OF THE INJECTION

MORE OVERALL POWER AND MAXIMUM RELIABILITY

WIFI-COM

ECULMB is the new GET ECU for the management of the innovative KTM and Husqvarna **2-stroke** EFI engines. ECULMB maximizes the performances and improves the stock power and throttle response. With this new ECU the drivability of the brand new **KTM EXC 250/300 TPI** and **Husqvarna TE 250i / 300i** is totally improved. The new ECUs are available with **2 maps**: Map 1 is in racing configuration with no **GPA** "traction control", Map 2 is in racing configuration with GPA "traction control" set at level 5. The included map switch allows an easy selection of the preferred configuration according to the racer's needs and riding style. **Map Switch** and **WiFi-COM** are included in the pack.
